Comment: The low figure for the fourth quarter of 1947 is not conclusive. In practice the quotas are cumulative. The sum stated at the beginning of the year may be greatly increased by the third month of the quarter concerned. The actual total of orders given, previous reports have shown, can be known only at the end of a quarter.

2. Opposite the following list of production categories is shown the value of goods ordered for delivery to the Soviet authorities on reparations account and credit amortization payments from 1 October 1945 through 1947. The figures are based on the situation as it existed 31 March 1947.

Comment: No explanation can be given for the discrepancies between the totals in para.1 and those in para.2)
